2. What does a fork do?

1 / 1 point

We keep your highest score

☐ It helps create a pull request.

☐ It copies a repository from Github into a local development environment.

☒ **Like** ☐ **Dislike** ☐ **Report an issue** It creates a copy of a repository in your account.

☐ It requires the developer to make a choice in a program's direction.

☒ **Correct**

That's right! A fork copies another repository into your account as a separate
